What is NEPHRICARE?

Packed with 100% medicinal herbs, **HerbCiti Nephricare is an OTC kidney function repair drug which is registered with the FDA.** It relieves urinary incontinence, kidney infection, nephritis, nephritic syndrome, and gouty arthritis for those with impaired kidney function. Nephricare also improves the root causes of kidney diseases by HerbCiti's complex synergistic interactions among herbs.

NDC: 80353-600-01

OTC NEPHRICARE

Nephricare Toxicity Test

- In order to examine the toxicity of Nephricare against normal cells, CPEK (interstitial cell) cells were treated with different concentrations of Nephricare up to 48 hours, and **there was no significant toxicity shown in the 100 µg/ml treatment group for 48 hours.**

Nephricare

In Vivo Study

- Nephricare was administered to four cases with renal failure for 3 months, 3 male cases with a life expectancy of 1-3 months and 1 female case with a life expectancy of 3-6 months, and the improvement was assessed.
- The blood tests showed that blood ammonia was higher than the normal range before administration of Nephricare in all cases but decreased close to the normal range after 3 months of Nephricare administration (Figure A).

A

Ammonia

Nephricare *In Vivo* Study

- In the case of blood urea nitrogen (BUN), it showed a tendency to decrease slightly after 3 months of Nephricare administration (Figure B),

- Creatinine decreased to the normal range in cases 2, 3, and 4 after 3 months of Nephricare administration (Figure C).
-

Nephricare *In Vivo* Study & Conclusion

- Urine protein-creatinine ratio (UPC), which indicates severe proteinuria, decreased in all cases (Figure D).
- In conclusion, administration of Nephricare showed improvements in inflammatory indicators and toxicity indicators in blood and urine of the cases with azotemia and renal failure (uremia).
Therefore, Nephricare is a great therapeutic that will help treat azotemia and renal failure (uremia).

Nephricare Efficacies

- Nephricare is made of 100% medicinal herbs, has no side effects, and is safe to take for a long period of time.
 - Nephricare helps restore glomerulus which composed of tiny blood vessels that filters out metabolites and waste.
 - Nephricare fundamentally improves kidney diseases such as early symptoms of nephritis, glomerulonephritis, nephrotic syndrome, proteinuria, and urinary incontinence.
 - Nephricare improves blood circulation by removing blood stasis in kidney blood.
-

- Nephricare restores kidney to help prevent uraemia and detoxifies toxins that are accumulated in blood.
- Nephricare enhances tiredness, thirstiness, decreased urine output, frequent bathroom trip, and swollen eyes, hands, feet, and calves.
- Nephricare improves symptoms of kidney diseases such as diarrhea, side pain, chills, vomiting, and hematuria.

Nephricare Efficacies

Nephricare Efficacies

- Nephricare is effective in relieving symptoms of gouty arthritis which is caused by the accumulation of uric acid around the joints due to glomerular filtration disorders.
 - Nephricare relieves fatigue and boosts energy to keep your body refreshed and energetic.
 - Nephricare reduces creatinine level and increases eGFR. It cleanses uric acid out of the body.
-

Nephricare Efficacies

- Nephricare purifies blood by filtering out phosphates and sulfates which are attached to amino acids.
 - Nephricare helps maintain homeostasis which regulates moisture, electrolytes, and acidity in body.
 - There are various enzymes and receptors in each cell membrane, which play a role in keeping the intracellular environment suitable for cells to survive and function.
-

- Nephricare helps facilitate the inability to take moisture out of cells, which is caused by renal failure.
- Nephricare helps stimulate bone marrow that produces red blood cells by facilitating hematopoiesis, which increases the production of red blood cells.
